STATEMENT OF THE CHIEF EXECUTIVE'S RESPONSIBILITIES AS THE ACCOUNTABLE OFFICER OF THE TRUST

The Chief Executive of the NHS has designated that the Chief Executive should be the Accountable Officer to the trust. The relevant responsibilities of Accountable Officers are set out in the Accountable Officers Memorandum issued by the Department of Health. These include ensuring that:

- there are effective management systems in place to safeguard public funds and assets and assist in the implementation of corporate governance;

- value for money is achieved from the resources available to the trust;

- the expenditure and income of the trust has been applied to the purposes intended by Parliament and conform to the authorities which govern them;

- effective and sound financial management systems are in place; and

- annual statutory accounts are prepared in a format directed by the Secretary of State with the approval of the Treasury to give a true and fair view of the state of affairs as at the end of the financial year and the income and expenditure, recognised gains and losses and cash flows for the year.

To the best of my knowledge and belief, I have properly discharged the responsibilities set out in my letter of appointment as an Accountable Officer.

Signed.....

Kevin McGee -Chief Executive

Date..6th June 2012

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ACCOUNTS

The directors are required under the National Health Service Act 2006 to prepare accounts for each financial year. The Secretary of State, with the approval of the Treasury, directs that these accounts give a true and fair view of the state of affairs of the trust and of the income and expenditure, recognised gains and losses and cash flows for the year. In preparing those accounts, directors are required to:

- apply on a consistent basis accounting policies laid down by the Secretary of State with the approval of the Treasury;

- make judgements and estimates which are reasonable and prudent;

- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the trust and to enable them to ensure that the accounts comply with requirements outlined in the above mentioned direction of the Secretary of State. They are also responsible for safeguarding the assets of the trust and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm to the best of their knowledge and belief they have complied with the above requirements in preparing the accounts.

By order of the Board

Signed.....
Kevin McGee - Chief Executive

Date:- 6th June 2012

Signed.....
Chris Bradshaw – Director of Finance and Performance.

Date:- 6th June 2012

GOVERNANCE STATEMENT 2011-12

1 Scope of responsibility

The Board is accountable for internal control. As Accountable Officer, and Chief Executive of this Board, I have responsibility for maintaining a sound system of internal control that supports the achievement of the organisation's policies, aims and objectives. I also have responsibility for safeguarding the public funds and the organisation's assets for which I am personally responsible as set out in the Accountable Officer Memorandum.

I am accountable to the Board of Directors for ensuring that plans and objectives are implemented and that progress towards implementation is regularly reported to the Board using accurate systems of measurement and data management. The Trust's corporate governance policies and other advice on expected standards of behaviour of staff apply to me as Chief Executive and to other members of staff. I subscribe to the code of conduct for NHS Managers.

Staff throughout the organisation are made aware of their responsibility to maintain high standards of conduct and accountability. In support of good governance, and to ensure the safekeeping and appropriate use of public funds, the Trust also maintains a proactive programme of counter-fraud and a "whistle blowing" policy.

The Trust has a range of mechanisms in place to facilitate effective working with key partners, in particular NHS Midlands and East Strategic Health Authority, NHS Warwickshire, NHS Coventry, Local Clinical Commissioning Groups in North Warwickshire, NHS Leicester County and Rutland, South Warwickshire NHS Foundation Trust, Nuneaton and Bedworth Borough Council, Warwickshire Overview and Scrutiny Committee, and University Hospital Coventry and Warwickshire NHS Trust. I meet regularly with the Chief Executives of each of these organisations, individually, jointly and collectively. Governance and risk issues are regularly discussed at a variety of health economy wide forums, including formal review meetings with the Strategic Health Authority and monthly meetings of Chief Executives.

2 The Governance Framework

The system of internal control is designed to manage risk to a reasonable level rather than to eliminate all risk of failure to achieve policies, aims and objectives; it can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is based on an ongoing process designed to:

- identify and prioritise the risks to the achievement of the organisation's policies, aims and objectives; and
- evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them efficiently, effectively and economically.

The system of internal control has been in place in the George Eliot Hospital for the year ended 31 March 2012 and up to the date of approval of the Annual Report and Accounts.

Governance arrangements in risk management are as follows:-

Chief Executive

The Chief Executive takes board level responsibility for governance, including risk management and has overall responsibility for maintaining an effective risk management system and for meeting all statutory requirements. Executive Directors and Clinical Directors have delegated responsibility for governance and risk management arrangements within their areas of control.

Trust Board

The Trust Board and Chief Executive ensure that the risk management arrangements are implemented monitored and reviewed and meet all legal and regulatory requirements. The Board receives reports from the Audit Committee and the Quality and Risk Committee on the Trust's risk control measures. Members of the Board receive annual appraisals on their own performance and regularly attend board development sessions. Members of the Board have formally adopted the NHS Code of Conduct and Accountability.

Audit committee

The Committee monitors the effectiveness of the risk management arrangements (operational non clinical and financial) on the Board's behalf. Membership of the Committee comprises the Non Executive Directors, one of whom is financially qualified and is the chair of the committee. The meeting is attended by the Director of Finance and Performance and Internal and External auditors. The Committee has met six times over the year. The Committee has completed the 2011 NHS Audit Committee Handbook checklist and complies with good practice.

Quality & Risk Committee

The Committee is a formal committee of the Trust Board with responsibility for managing, mitigating and monitoring both risk and quality. It co-ordinates risk identification using reports from the divisions, clinical audit and governance teams and proposes action to deal with and reduce risks across the Trust. The Committee regularly updates the Audit Committee in relation to areas of performance risk and quality. Membership of the Committee is Non Executive and Executive Directors, meeting are chaired by a Non Executive Director, and meeting are attended and supported by the Board Secretary and the Head of Governance. The Committee has met ten times over the year.

The Trust seeks to learn from incidents and good practice is discussed in a number of areas which includes Back to Basic meetings, Patient Experience Group, Patient Safety Group, Serious Incident Group, individual divisions' governance meetings and also at Board level.

The Trust has an established Information Governance Group with responsibility for overseeing day to day information governance issues; developing and maintaining policies, standards, procedures and guidance and reviewing related issues and risks, reporting to the Quality and Risk Committee. The Medical Director, the Trust Caldicott Guardian, supported by the Information Governance team, is responsible for the establishment of policies for the control and appropriate sharing of patient information with other agencies. The Director of Finance & Performance is the appointed Senior Information Risk Owner.

The Trust reviewed and updated its governance arrangements in January 2012 when the Board of Directors revised Standing Orders and Standing Financial Instructions, adopted a Board Etiquette and re-affirmed the NHS Code of Conduct and Accountability.

3 Risk Assessment

The Trust has adopted an approach to risk management with the structures and processes in place to successfully deliver the risk management objectives. Leadership arrangements are defined within the Trust and are supported by job descriptions and objectives

In December 2011 a restructuring of divisions took place. This has enabled leadership to be even further embedded at divisional level where managers have responsibility for risk identification, assessment and analysis. All staff are required to complete mandatory and essential update training, which covers risk management, risk assessments and health and safety training and all new members of staff are required to attend a mandatory induction (supplemented by local induction) which covers all key elements of risk management. The Trust policy on the development of policies ensures all trust policies must be equality impact assessed before seeking approval by the Board.

The Trust has an Assurance Framework, embedded in the regular performance reporting and management arrangements, both to the Board and throughout the Trust. The Assurance Framework provides a comprehensive framework for the management of principal risks. The principal risks are mapped to the Trust's strategic objectives and the framework also demonstrates the links with the Care Quality Commissions outcomes. The Framework examines the system of internal control and records the actions to be taken to address gaps in control or assurance. The review of the Assurance Framework is a standing item at the Quality and Risk Committee.

The Assurance Framework has identified areas where the control framework needs improvement. The Framework also identifies a number of "red" risks where action plans are in place to mitigate the risks which are routinely being reported to the Quality and Risk Committee; these include:-

Poor communication both internally and external resulting in a lack of continuity of care for patients – action is being taken in developing information technology solutions including patient monitoring processes.

Poor maintenance of plant and equipment leading to health and safety implications to both staff and patients - action is being taken to update records, review priorities and staffing levels in estate services.

Implementing change in delivery of community services transferred to the management of the Trust in April 2011 - action has been taken through the management of the service level agreement.

Improve reputation and development relationships with other providers - action taken through positive press release and implementation of an improved strategy to communicate with other providers.

Improved accuracy of financial forecasts prevents timely decisions- action has been take to improve forecasts working with commissioners and in developing the Cost Improvement Process.

Cost improvement plans are not delivered - action has been taken to identify more savings and provide more structure to the process.

Services are financially unsustainable and cannot be supported - action taken to base savings on service line reporting and all savings are quality checked before approval.

The action being taken above has resulted in all the risks, with the exception of delivery of the cost improvement programme, being downgraded to amber.

The action plans are owned by Executive Directors and they are held to account for progress at the Quality and Risk Committee.

The Trust is also managing the following risks to achieving business plan objectives in 2011-12:-

Mortality rates – the Department of Health published new mortality indicators in October 2011 which placed the Trust having the highest mortality rates of all hospital's in England. The Trust responded by commissioning an independent report which has now been used to put in place a strategy to improve performance.

Paediatric service - the medical school withdrew training recognition to the paediatric service in December 2011. The Trust responded by recruiting middle grade clinical staff and developing a local network to sustain the service. The future of paediatric services are currently being reviewed with commissioners and other providers in Coventry and Warwickshire.

Foundation trust status - the Trust decided in September to secure foundation status through working with a partner rather than making application as a stand-alone foundation trust. Responding to this decision the Trust has made a Tripartite Formal Agreement and established the Securing a Sustainable Future project to identify and implement a partnership arrangement by April 2014.

During 2011-12 the Trust continued to maintain the controls governing the transfer of patient identifiable data as part of the information governance assurance process. No incidents of patient identifiable data being released into the public domain occurred directly by the Trust.

I am assured by this process that there are no significant deficiencies within the system of control.

4. The risk and control framework

The Trust has adopted an integrated framework for risk management supported by policies and procedures; this provides a comprehensive framework for the management of principal risks and is mapped to the Trust's principal/strategic objectives and to Care Quality Commission outcomes where applicable. These are in turn mapped to the risk register to assess the potential risks that threaten the achievement of the Trust objectives, the existing control measures and assurance in place.

The Risk Management Strategy is approved by the Board. The strategy is published widely and includes:

- The aims and objectives for risk management in the Trust.
- The relationship and responsibilities of the relevant committees.
- The role of key individuals with responsibility for advising on and co-ordinating risk management
- A description of the processes that the organisation employs in reviewing risk management arrangements and in gaining assurance on risk management.
- Guidance on what is acceptable risk to the organisation.

The strategy defines the risk management process including risk identification, analysis and evaluation. The strategy was approved by the Board in March 2011.

In February 2012 the Board approved a revised corporate risk grading matrix the benefits include an improved management tool and reporting mechanism, that will ensure clear and accurate scoring of risks and enable appropriate comparison and benchmarking against other NHS trusts. This is currently being incorporated into a revised risk management strategy and will be approved by the Board accordingly.

The strategy includes a description of the overall risk management process and requires that all hazards are assessed and risks recorded, when identified, in a standard format risk register and prioritised using a standard scoring methodology. Divisions are required to maintain systems and processes that enable them to operate within the Risk Management Strategy.

The strategy clearly states that it is the responsibility of all staff to identify risk and communicate those risks, through the line management structure and, ultimately to the appropriate committee. This responsibility is reinforced through annual statutory update training.

In June 2011 the Trust replaced its internal risk recording system with a new risk management system. Divisions input directly to the system to record risks and action being taken to manage the risk. The corporate risk register is maintained by the Governance Department and all significant risks identified through the risk assessment process are included in the register in addition to risks being managed in the divisions.

The risk management system is continually reviewed to ensure that robust systems are in place at all levels within the Trust. The risk register is an integral part of the system. Amendments to the risk register are generated and actioned at both divisional and corporate level.

The Trust recognises the flow of risks from board to ward and vice versa. The Healthcare Risk Group reviews and challenges the risks placed on the divisional risk registers, has an

oversight of the plans put in place to mitigate risks to ensure actions are being taken, and also acts as the conduit between the Board and ward in disseminating risk both ways. The group escalates significant risks which cannot be managed locally to the corporate risk register and disseminate risks to divisions where appropriate. The corporate risk register and divisional risk registers is a standing agenda item for the Quality & Risk Committee and the corporate risk register is reviewed by the Board.

Communication and consultation is undertaken with internal and external stakeholders when appropriate. The Trust has continued to develop its communication channels with its partners and within the Trust. Regular reports are prepared for divisions, Quality and Risk Committee and the Trust Board on the incidents reported, both clinical and non clinical. Additionally regular newsletters advise staff of incidents or near misses and lessons learnt.

The Trust completed the Information Governance Toolkit in line with prescribed timescale with a satisfactory score of 74% against the enhanced Information Governance requirements which reflects a realistic view of the challenges faced by the Trust around areas such as the new requirements for Information Governance training. All relevant Information Technology security related policies, including the Information Security policy, have been reviewed, distributed, and added to the intranet catalogue. The links to all policies are published on a regular basis. A number of measures remain in place to prevent the loss of data including the encryption of laptops, the use of encrypted memory sticks, and the introduction of email encryption software, all of which have been implemented along with lockdown laptops. Smartcard access rights are regularly reviewed. Security incidents are reported and investigated fully, and operational checks include intrusion detection tests. An internal audit of Information Governance compliance was completed in February 2012 and the Trust has approved a formal action plan to manage compliance and is reviewing the evidence required to support future compliance checks.

There is a fully established Internal Audit programme approved by the Audit Committee in the Strategic Internal Audit Plan of Work and the Audit Committee receives reports, which provide assurance of the Trust's key internal control objectives. The Internal Auditor presents an Annual Audit opinion to inform those charged with Governance on the overall level of assurance on the system of internal control. Internal audit report recommendations are tracked in a system to record action taken.

All risks identified which involve public stakeholders, including Primary Care Trusts and the Strategic Health Authority, are dealt with in an open and transparent way using the appropriate recording mechanisms and include appropriate communication strategies with the public.

The Trust has an established Counter Fraud Service provided by a Local Counter Fraud Specialist (LCFS). In addition to investigation work the LCFS also carries out an agreed amount of proactive work at the Trust which includes Fraud Awareness presentations and workshops, review of Trust policies and procedures to identify key areas of fraud risk within the Trust and production of newsletters and articles to inform staff of local and national counter fraud work and investigations.

The LCFS regularly attends the Audit Committee meetings and reports back to both the Director of Finance and the Audit Committee on any proactive or reactive work undertaken at the Trust.

The Trust's External Auditors conduct an annual review of the Trust's control environment and present an annual report to those charged with governance in the form of an Annual Audit Letter.

The Trust involves stakeholders by informing and consulting on the management of any significant risks. Stakeholder involvement is sought through:

- monthly open board meetings and information provided on the Trust's web site;

- the wide range of communication and consultation mechanisms, which already exist with relevant stakeholders, both internal and external; and

- consultation on appropriate policy documents; stakeholders have the opportunity to comment on the risk elements.

- the Trust has introduced a Member Advocacy Panel (MAP) which mirrors to some extent the Board of Governors in a foundation trust. The panel members have no statutory or legal powers, but play an important link to the hospital membership and the wider community.

Control measures are in place to ensure that all the organisations obligations under equality, diversity and human rights legislation are complied with. The Trust has an Equality and Diversity Group, chaired by the Associate Director of Primary/Community Care. Its purpose is to promote equality of opportunity, treatment, dignity and respect for all patients, staff and members of the communities we serve. The group advises and makes recommendations to the Board of Directors, committees and other groups on equality and diversity matters, compliance with statutory and other requirements and on areas for improvement.

As an employer with staff entitled to membership of the NHS Pension scheme, control measures are in place to ensure all employer obligations contained within the scheme regulations are complied with. This includes ensuring that deductions from salary, employer's contributions and payments in to the scheme are in accordance with the scheme's rules, and that member pension scheme records are accurately updated in accordance with the timescales detailed in the regulations.

The Trust has undertaken risk assessments and Carbon Reduction Delivery Plans are in place in accordance with emergency preparedness and civil contingency requirements, as based on UKCIP 2009 weather projects, to ensure that this organisation's obligations under the Climate Change Act and the Adaptation Reporting requirements are complied with.

The Trust is subject to NHS Litigation Authority assessments and during 2011-12 the Trust was continued to be assessed at level 1.

The Trust is fully compliant with Care Quality Commission essential standards of quality and safety.

The Trust has completed a self assessment of performance against the 16 Care Quality Outcomes and in February 2012 assessed itself as being compliant with all 16 outcomes. There is an established process to assess performance against the outcomes and control measures are in place to ensure that all the organisation's obligations under equality, diversity and human rights legislation are complied with.

The Trust operates a Serious Incident Requiring Investigation (SIRI) system where incidents are recorded, investigated and action is taken to prevent similar incidents in the future. Incidents are reported to the Quality and Risk Committee and to the Board of Directors in public session.

5. Review of effectiveness

As Accountable Officer, I have responsibility for reviewing the effectiveness of the system of internal control. My review is informed in a number of ways. The Head of Internal Audit provides me with an opinion on the overall arrangements for gaining assurance through the Assurance Framework and on the controls reviewed as part of the internal audit work. Executive managers within the organisation who have responsibility for the development and maintenance of the system of internal control provide me with assurance. The Assurance Framework itself provides me with evidence that the effectiveness of controls that manage the risks to the organisation achieving its principal objectives have been reviewed. My review is also informed by:

- the opinion of both Internal Audit and External Audit, given in reports to the Audit Committee; and

- reports presented to the Quality and Risk Committee, Executive Group and supporting groups which include the Financial Management Group, Healthcare Management Board, Human Resources Group and

I have been advised on the implications of the result of my review of the effectiveness of the system of internal control by the Board of Directors, Audit Committee and Quality and Risk Committee. A plan to address weaknesses and ensure continuous improvement of the system is in place.

The Board is assured that there are robust mechanisms in place to ensure that the evidence to support compliance is in place and available, and is routinely monitored and reported upon within the Trust's governance and performance management framework.

The Trust has continued to monitor data quality issues and regular reports have been made to Board of Directors and sub committees providing assurances on the quality of data. The Trust has formally reviewed data quality and concluded arrangements are in place for producing relevant and reliable information to support decision making although weaknesses in some areas in the design and inconsistent application of controls put the achievement of particular objectives at risk. This conclusion is based on evidence from the Payment By Results Assurance Audit 2011/12, the Payment By Results National Benchmarking tool, findings in the Mott MacDonald Report on mortality rates, and improved performance in 2011-12 in the key areas of access to cancer and accident and emergency services, infection prevention and control, and waiting times in elective care, following decisions made using information reported to the Board.

The process that has been applied to maintain and review the effectiveness of the system of internal control is as follows:

The Trust's Audit Committee approves an annual internal audit programme and receives all internal audit reports. The Committee, with the support of the Quality and Risk Committee, reviews the establishment and maintenance of an effective system of integrated governance, risk management and internal control across the whole organisations activities (both clinical and non clinical), that supports the achievement of the organisation's objectives. In 2011-12 the Committee submitted an annual report on the previous 12 months to Board of Directors, which highlighted the work of the Committee with regard to the final accounts, joint work with the Quality and Risk Committee on risk management and the assurance framework and work in ensuring improvements in the system of internal control; the report concluded a successful and effective year. In 2011-12 the Committee completed a self assessment of its own performance to ensure compliance with the NHS Audit Committee Handbook 2011.

The Trust's Quality & Risk Committee on behalf of the Board of Directors and Chief Executive reviews the establishment and maintenance of an effective system of risk management across the whole Trust's activities (both clinical and non clinical) that supports the achievement of the Trust's objectives. The Committee is currently reviewing its own effectiveness using the "Burdett Checklist" and is updating the terms of reference.

The Board receives a monthly Compliance, Performance & Finance Report (based on Monitor's Compliance Framework for foundation trusts) which includes exception reports on operations, human resources and finance.. The Board receives a monthly Quality Report which includes hospital acquired infection rates, performance in meeting quality and innovation targets and patient experience.

The Trust has prepared Quality Accounts for 2011-12 in the format required by the Department of Health and Audit Commission and which builds on the experience gained from preparing the accounts in 2010-11. The accounts will be approved by the host commissioner

and shared with LINKs and the local Overview and Scrutiny Committee. The accounts are to be reviewed by the Audit Commission as part of the audit of the annual report and accounts.

Internal Audit's review of the organisation's overall arrangements for gaining assurance has concluded that:

'*Significant assurance can be given that there is a generally sound system of internal control, designed to meet the organisation's objectives, and that controls are generally being applied consistently. However, some weaknesses in the design and/or inconsistent application of controls put the achievement of particular objectives at risk'*

This view is based on Internal Audit reports prepared in 2011-12 where positive opinions were given following the audits.

Weaknesses were identified in, systems designed for the management of staff sickness, the induction of temporary staff, the collection of income from car parks, and the administration of the patient administration system

Weaknesses in the management of staff sickness and induction of temporary staff were found in documented procedures for recording and reporting out of hour's sickness for medical staff, local procedures for reporting and recording sickness and welcome back to work meetings, local induction for agency nursing and locum doctors and pre-employment checks for temporary staff. Action plans are being put in place to address these weaknesses, ward and department procedures for the management of sickness including the documentation are being established and pre-employment checks are now carried out for all temporary staff, arrangements are being made for all temporary staff to complete a local induction programme and service level agreements with agencies are being reviewed.

Weaknesses in the administration of the patients' administration system were found in the timeliness of updating the system to support bed management, and restricted access to the system by ward nursing staff because of expired smart cards and lack of computers in ward areas. An action plan has been put in place to improve access so that records can be kept up to date.

During 2011-12 there were a number of referrals to the Local Counter Fraud Specialist which resulted in 8 investigations. Three investigations were concluded with no fraud proven, one investigation was passed to another government department to pursue, two investigations were referred for disciplinary action and two remain open with the LCFS pursuing voluntary payments from those involved.

The NHS Protect Quality Assurance assessment completed during 2011-12 based on work completed in 2010-11 has awarded the Trust Level 3 (Performing Well), an improvement over the level 2 assessment made the previous year. This Level 3 assessment will now be retained by the Trust until April 2013, whereupon the Trust will be reviewed again as part of the new NHS Protect Qualitative Assessment.

In September 2011 the Acute Services were successful in their re-assessed for level 1 compliance against the NHS Litigation authority standards. Maternity services are not due to re-assessed until December 2012 and currently hold level 1.

During the past 12 months the Trust has recorded 119 Significant Incidents Requiring Investigation (SIRI). The largest single trend (category) reported has been related to pressure damage. Each incident has been investigated using Root Cause Analysis (RCA) and actions put in place to reduce the likelihood of re-occurrence. The Trust has also launched a Pressure Ulcer Prevention (PUP) campaign to raise awareness across the Trust.

In October 2011-12 following publication by the Department of Health of new mortality indicators the Trust has launched a strategy to improve performance. The review highlighted four key areas for improvement in continuity of care, patient flow, information management and external factors. The plan to improve performance has been developed with stakeholders

who commission and provide health and social care services in the local economy. The plans includes:-

Improving continuity of care by reducing the movement of patients between wards and consultant medical staff

Improvement of patient flow between primary and secondary care and ensuring better care is provided at weekends

Improvement in clinical information systems and records to support better care of patients

Improvement in care provided in the wider community for patients at the end of their lives and for patients with high obesity, alcoholic related mortality, high rates of smoking and cardio vascular related deaths. The Trust will work in close partnership with all stakeholders to ensure the most appropriate social and healthcare is provided to meet the needs in the local community.

The review reinforced findings regarding aspects of data quality in relation to clinical coding that were also apparent from internal and external audit reports undertaken around the same time. Improvements in data quality are a significant part of the improvement plan.

In 2011-12 the Trust has achieved break-even with £2.3m transformational support funding provided through NHS Warwickshire. The support recognises the strategic objective to plan reduced expenditure in acute hospital services within the local economy. The Trust plan was to achieve a surplus of £1.2m as part of a financial recovery plan to address a £7.3m deficit incurred in 2005-06. The shortfall in surplus and need for support were explained by under-achievement against an extremely challenging cost improvement target of £11.2m (actual achievement £9.0m), increased medical staff costs to support Paediatrics and reduced income from the West Leicestershire area.

In April 2006 a Public Interest Report was issued under Section 8 of the Audit Commission Act 1998 in relation to the financial standing of the Trust. The Trust developed a 5 year Financial Recovery Plan (FRP) which was agreed with the Strategic Health Authority and the Department of Health and secured Department of Health Working Capital loan to provide cash support in the short/medium term. Since then the Trust has achieved revenue surplus of £4.8m and in 2011-12 has completed the repayment of the loan. . External Auditors have issued a Section 19 letter to the Department of Health because the Trust has not met continued to meet the recovery plan to achieve its statutory duty to break-even. The letter sets out the current financial position of the Trust, the risks to its financial plan for 2012/13 and the plan to identify a strategic partner in order to achieve long term financial sustainability.

The Trust has made a Tripartite Formal Agreement (TFA) with NHS Midlands and East and the Department of Health setting out the plan to achieve foundation trust status. The Board of Directors decided this would be achieved by partnering with another organisation and has established a project (Securing a Sustainable Future) to identify a suitable partnership to achieve foundation trust status or an alternative organisational model by April 2014. The project is currently on plan to approve an Outline Business Case in May 2012.

The Trust has adhered to the terms and conditions of its acute healthcare contract and had no outstanding performance notices at the end of the year. The Trust is working with local commissioners to support the national QIPP agenda and improve the quality of services.

The Trust has met all its principal operational performance targets in aggregate for the year and has demonstrated significant improvement in a number of areas. Measured against the governance risk ratings used in Monitor's Compliance Framework, achievement in each quarter has been as follows:

	11/12 Q1	11/12 Q2	11/12 Q3	11/12 Q4
Governance rating	1	1	0	1

The risk ratings of 1.0 in each quarter were each for different reasons:

Quarter 1 – 62 day cancer waiting time target not achieved (83.6% vs. 85% target)

Quarter 2 – C Difficile cases more than plan (12 vs. 8 plan)

Quarter 4 – A&E 4 hour waiting time target not achieved (94.7% vs. 95% target)

With the exception of the internal control issues that I have outlined in this statement my review confirms that George Eliot Hospital NHS Trust has a generally sound system of internal control that supports the achievement of its policies, aims and objectives and that those control issues have been or are being addressed.

Signed on behalf of the Board of Directors:

Kevin McGee. Chief Executive

Date: 6th June 2012

George Eliot Hospital NHS Trust. (RLT)

INDEPENDENT AUDITOR'S REPORT TO THE DIRECTORS OF GEORGE ELIOT HOSPITAL NHS TRUST

I have audited the financial statements of George Eliot Hospital NHS Trust for the year ended 31 March 2012 under the Audit Commission Act 1998. The financial statements comprise the Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Taxpayers' Equity, the Statement of Cash Flows and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England. *I* have also audited the information in the Remuneration Report that is subject to audit, being:

- the table of salaries and allowances of senior managers on pages 36 and 37;
- the table of pension benefits of senior managers on pages 36 and 37; and
- the table of pay multiples on page 41.

This report is made solely to the Board of Directors of George Eliot Hospital NHS Trust in accordance with Part II of the Audit Commission Act 1998 and for no other purpose, as set out in paragraph 45 of the Statement of Responsibilities of Auditors and Audited Bodies published by the Audit Commission in March 2010.

Respective responsibilities of Directors and auditor

As explained more fully in the Statement of Directors' Responsibilities, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. My responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require me to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Trust's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the Trust; and the overall presentation of the financial statements. In addition, I read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If I become aware of any apparent material misstatements or inconsistencies I consider the implications for my report.

Opinion on financial statements

In my opinion the financial statements:

give a true and fair view of the financial position of George Eliot Hospital NHS Trust as at 31 March 2012 and of its expenditure and income for the year then ended; and

have been prepared properly in accordance with the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England.

Opinion on other matters

In my opinion:

- the part of the Remuneration Report *s*ubject to audit has been prepared properly in accordance with the requirements directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England; and
- the information given in the annual report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which I report by exception

I report to you if:

- in my opinion the governance statement does not reflect compliance with the Department of Health's Guidance;
- I issue a report in the public interest under section 8 of the Audit Commission Act 1998

I have nothing to report in these respects

Auditor's responsibilities

I have a duty under the Audit Commission Act 1998 to refer the matter to the Secretary of State if they have a reason to believe that the Trust, or an officer of the Trust, is about to make, or has made, a decision involving unlawful expenditure, or is about to take, or has taken, unlawful action likely to cause a loss or deficiency.

On the 7th June 2012 I referred a matter to the Secretary of State under section 19 of the Audit Commission Act 1998 in relation the Trust's failure to achieve breakeven taking one year with another over a 5 year period ending 31 March 2012. This, I have reason to believe, exceeds the Trust's statutory powers as the Board is accountable for financial control and for ensuring that the Trust meets its statutory duty to break-even under paragraph 2(1) of Schedule 5 to the National Health Service Act 2006.

Conclusion on the Trust's arrangements for securing economy, efficiency and effectiveness in the use of resources

Respective responsibilities of the Trust and auditor

The Trust is responsible for putting in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources, to ensure proper stewardship and governance, and to review regularly the adequacy and effectiveness of these arrangements.

I am required under Section 5 of the Audit Commission Act 1998 to satisfy myself that the Trust has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the Audit Commission requires me to report to you my conclusion relating to proper arrangements, having regard to relevant criteria specified by the Audit Commission.

I report if significant matters have come to my attention which prevent me from concluding that the Trust has put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources. I am not required to consider, nor have I considered, whether all aspects of the Trusts arrangements for securing economy, efficiency and effectiveness in its use of resources are operating effectively.

Scope of the review of arrangements for securing economy, efficiency and effectiveness in the use of resources

I have undertaken my audit in accordance with the Code of Audit Practice, having regard to the guidance on the specified criteria, published by the Audit Commission in October 2011, as to whether the Trust has proper arrangements for:

- securing financial resilience; and
- challenging how it secures economy, efficiency and effectiveness.

The Audit Commission has determined these two criteria as those necessary for me to consider under the Code of Audit Practice in satisfying myself whether the Trust put in place proper arrangements for securing economy, efficiency and effectiveness in its use of resources for the year ended 31 March 2012.

I planned my work in accordance with the Code of Audit Practice. Based on my risk assessment, I undertook such work as I considered necessary to form a view on whether, in all significant respects, the Trust had put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources.

Basis for qualified conclusion

In considering the Trust arrangements for securing financial resilience, I identified the following:

- to achieve its 2011/12 forecast surplus of £1.2 m the Trust set a £11.2m cost reduction plan.

- the Trust has set a breakeven budget in 2012/13.The budget includes a higher level of income (£2.5m) than that contracted for with its commissioners. It also includes a significant cost reduction plan (£6.8m or 6.1 per cent of turnover). The uncontracted income and significant cost reduction plan represent a risk to the Trust's financial resilience; and

- the Trust's Board of Directors is currently reviewing its strategic plan, and its long term clinical and financial viability. In September 2011 it agreed that the Trust would no longer seek to pursue foundation trust status as a 'standalone' organisation, and will instead look for a 'partner' organisation, with whom they can work to secure a strong and sustainable future for the George Eliot and local healthcare services. In the interim the Trust has developed a Integrated Business Plan up to 2014/15. The plan includes cost reduction plans of 7.6 per cent and 8.1 per cent in 2013/14 and 2014/15 to deliver a surplus of £1.1m in each year. It is unclear whether this continued level of cost reduction plans can be delivered without affecting the Trust's financial stability or patient care.

In considering the Trust's arrangements for challenging how it secures economy, efficiency and effectiveness, I identified the following:

- Findings from an external review of the information used to calculate mortality ratings and internal audit work has highlighted the need for the Trust to improve its information management system to support clinical and managerial decision-making. As a consequence I have concluded that the Trust has not, in all instances, put in place appropriate arrangements to ensure it is producing relevant and reliable data and information to support the prioritization of resources

Qualified Conclusion

On the basis of my work, having regard to the guidance on the specified criteria published by the Audit Commission in October 2011, with the exception of the matters reported in the basis for qualified conclusion paragraph above, I am satisfied that in all significant respects George Eliot NHS Trust has put in place proper arrangements to secure economy, efficiency and effectiveness in its use of resources for the year ending 31 March 2012.

NOTES TO THE ACCOUNTS

1. Accounting Policies

The Secretary of State for Health has directed that the financial statements of NHS trusts shall meet the accounting requirements of the NHS Trusts Manual for Accounts, which shall be agreed with HM Treasury. Consequently, the following financial statements have been prepared in accordance with the 2011-12 NHS Trusts Manual for Accounts issued by the Department of Health. The accounting policies contained in that manual follow International Financial Reporting Standards to the extent that they are meaningful and appropriate to the NHS, as determined by HM Treasury, which is advised by the Financial Reporting Advisory Board. Where the NHS Trusts Manual for Accounts permits a choice of accounting policy, the accounting policy which is judged to be most appropriate to the particular circumstances of the trust for the purpose of giving a true and fair view has been selected. The particular policies adopted by the trust are described below. They have been applied consistently in dealing with items considered material in relation to the accounts.

1.1 Accounting convention

These accounts have been prepared under the historical cost convention modified to account for the revaluation of property, plant and equipment, intangible assets, inventories and certain financial assets and financial liabilities.

1.2 Acquisitions and discontinued operations

Activities are considered to be ‘acquired’ only if they are taken on from outside the public sector. Activities are considered to be ‘discontinued’ only if they cease entirely. They are not considered to be ‘discontinued’ if they transfer from one public sector body to another.

1.3 Transforming Community Services (TCS) transactions

Under the TCS initiative, services historically provided by PCTs have transferred to other providers - notably NHS Trusts and NHS Foundation Trusts. Such transfers fall to be accounted for by use of merger accounting. The Treasury FREM provides that where a transfer takes place in 2011-12, the recipient of the transfer will account for transferred activity in full for the period (and the original provider for none) to reflect the position had the transfer always applied. All transfers to George Eliot Hospital took place on 1 April 2011.

For TCS transactions specifically, it is impracticable to adjust the prior period's revenue account in each body and so restatement is effected by an adjustment to 1 April 2011 opening balances rather than by full restatement of comparators. No property operating leases were transferred from the PCTs. The only other transfers were petty cash and balances on lease cars. These transfers were so small that they did not warrent the restatement of 1 April 2011 opening balances, and were treated as purchases during 2011-12 instead.

1.4 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Trust’s accounting policies, management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from those estimates and the estimates and underlying assumptions are continually reviewed. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

1.4.1 Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see below) that management has made in the process of applying the Trust’s accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

-Management has declared that the financial statements are free from any misstatement as a result of fraud or any weakness in systems of internal control.

-Impairment reviews were completed on property plant and equipment to ensure values were not overstated at the 31 March 2012.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

-A holiday pay accrual for annual leave carried forward at the 31st March 2012 is estimated based on annual leave records maintained in the Trust.

-The Digital Medical Records project makes assumptions with regard to the split of expenditure between revenue and capital and within capital allocated to tangible and intangible, which on completion of the project will be amortised over the life of the digital record.

-Healthcare SLA over/under performance with some commissioners is estimated based on patient activity; the final agreement of income will be made when the information is validated in accordance with the contracting timetable.

-Two former employees are being paid a permanent injury allowance by the Trust. Their life expectancy is calculated using published interim life tables for England published by the Office of National Statistics, with the resulting calculated provision being discounted by 2.8%. Every year their life expectancy and the appropriate discount factor is reveiwed and updated.

1.5 Revenue

Revenue in respect of services provided is recognised when, and to the extent that, performance occurs, and is measured at the fair value of the consideration receivable. The main source of revenue for the trust is from commissioners for healthcare services. Revenue relating to patient care spells that are part-completed at the year end are apportioned across the financial years on the basis of costs incurred to date compared to total expected costs.

Where income is received for a specific activity that is to be delivered in the following year, that income is deferred.

The Trust receives income under the NHS Injury Cost Recovery Scheme, designed to reclaim the cost of treating injured individuals to whom personal injury compensation has subsequently been paid e.g. by an insurer. The Trust recognises the income when it receives notification from the Department of Work and Pension's Compensation Recovery Unit that the individual has lodged a compensation claim. The income is measured at the agreed tariff for the treatments provided to the injured individual, less a provision for unsuccessful compensation claims and doubtful debts.

1.6 Employee Benefits

1.6.1 Short-term employee benefits

Salaries, wages and employment-related payments are recognised in the period in which the service is received from employees except for the cost of leave earned but not taken by employees at the end of the period is recognised in the financial statements to the extent that employees are permitted to carry forward leave into the following period.

Retirement benefit costs

Past and present employees are covered by the provisions of the NHS Pensions Scheme. The scheme is an unfunded, defined benefit scheme that covers NHS employers, General Practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme: the cost to the NHS body of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period.

Notes to the Accounts - 1. Accounting Policies (Continued)

For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to expenditure at the time the Trust commits itself to the retirement, regardless of the method of payment.

1.7 Other expenses

Other operating expenses are recognised when, and to the extent that, the goods or services have been received. They are measured at the fair value of the consideration payable.

1.8 Property, plant and equipment

Recognition

Property, plant and equipment is capitalised if:

● it is held for use in delivering services or for administrative purposes;
● it is probable that future economic benefits will flow to, or service potential will be supplied to, the trust;
● it is expected to be used for more than one financial year;
● the cost of the item can be measured reliably; and
● the item has cost of at least £5,000; or
● Collectively, a number of items have a cost of at least £5,000 and individually have a cost of more than £250, where the assets are functionally interdependent, they had broadly simultaneous purchase dates, are anticipated to have simultaneous disposal dates and are under single managerial control; or
● Items form part of the initial equipping and setting-up cost of a new building, ward or unit, irrespective of their individual or collective cost.

Where a large asset, for example a building, includes a number of components with significantly different asset lives, the components are treated as separate assets and depreciated over their own useful economic lives.

Valuation

All property, plant and equipment are measured initially at cost, representing the cost directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management. All assets are measured subsequently at fair value.

Land and buildings used for the trust's services or for administrative purposes are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation less any subsequent accumulated depreciation and impairment losses.

Revaluations are performed with sufficient regularity to ensure that carrying amounts are not materially different from those that would be determined at the end of the reporting period. Fair values are determined as follows:

● Land and non-specialised buildings – market value for existing use
● Specialised buildings – depreciated replacement cost as indexed on 31 March 2012 using indices supplied by the valuer, GVA Grimley Limited.

Until 31 March 2008, fixtures and equipment were carried at replacement cost, as assessed by indexation and depreciation of historic cost. From 1 April 2008 indexation has ceased. The carrying value of existing assets at that date will be written off over their remaining useful lives and new fixtures and equipment are carried at depreciated historic cost as this is not considered to be materially different from fair value.

An increase arising on revaluation is taken to the revaluation reserve except when it reverses an impairment for the same asset previously recognised in expenditure, in which case it is credited to expenditure to the extent of the decrease previously charged there. A revaluation decrease that does not result from a loss of economic value or service potential is recognised as an impairment charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure. Impairment losses that arise from a clear consumption of economic benefit should be taken to expenditure. Gains and losses recognised in the revaluation reserve are reported as other comprehensive income in the Statement of Comprehensive Income.

Subsequent expenditure
Where subsequent expenditure enhances an asset beyond its original specification, the directly attributable cost is capitalised. Where subsequent expenditure restores the asset to its original specification, the expenditure is capitalised and any existing carrying value of the item replaced is written-out and charged to operating expenses.

1.9 Intangible assets

Recognition

Intangible assets are non-monetary assets without physical substance, which are capable of sale separately from the rest of the trust's business or which arise from contractual or other legal rights. They are recognised only when it is probable that future economic benefits will flow to, or service potential be provided to, the trust; where the cost of the asset can be measured reliably, and where the cost is at least £5,000.

Intangible assets acquired separately are initially recognised at fair value. Software that is integral to the operating of hardware, for example an operating system, is capitalised as part of the relevant item of property, plant and equipment. Software that is not integral to the operation of hardware, for example application software, is capitalised as an intangible asset. Expenditure on research is not capitalised: it is recognised as an operating expense in the period in which it is incurred. Internally-generated assets are recognised if, and only if, all of the following have been demonstrated:
- the technical feasibility of completing the intangible asset so that it will be available for use
- the intention to complete the intangible asset and use it
- the ability to sell or use the intangible asset
- how the intangible asset will generate probable future economic benefits or service potential
- the availability of adequate technical, financial and other resources to complete the intangible asset and sell or use it
- the ability to measure reliably the expenditure attributable to the intangible asset during its development

Measurement
The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the criteria above are initially met. Where no internally-generated intangible asset can be recognised, the expenditure is recognised in the period in which it is incurred.

Following initial recognition, intangible assets are carried at fair value by reference to an active market, or, where no active market exists, at amortised replacement cost (modern equivalent assets basis), indexed for relevant price increases, as a proxy for fair value. Internally-developed software is held at historic cost to reflect the opposing effects of increases in development costs and technological advances.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.10 Depreciation, amortisation and impairments

Freehold land, properties under construction, and assets held for sale are not depreciated.

Otherwise, depreciation and amortisation are charged to write off the costs or valuation of property, plant and equipment and intangible non-current assets, less any residual value, over their estimated useful lives, in a manner that reflects the consumption of economic benefits or service potential of the assets. The estimated useful life of an asset is the period over which the Trust expects to obtain economic benefits or service potential from the asset. This is specific to the Trust and may be shorter than the physical life of the asset itself. Estimated useful lives and residual values are reviewed each year end, with the effect of any changes recognised on a prospective basis. Assets held under finance leases are depreciated over their estimated useful lives.

Equipment is depreciated evenly over the estimated life of the asset.

	Years
Medical equipment and engineering plant and equipment	5 to 15
Furniture	10
Mainframe information technology installations	8
Soft furnishings	7
Software Licences	5
Office and information technology equipment	4 to 5
Set-up costs in new buildings	10
Vehicles	7

Development costs are depreciated over the life of the project

At each reporting period end, the trust checks whether there is any indication that any of its tangible or intangible non-current assets have suffered an impairment loss. If there is indication of an impairment loss, the recoverable amount of the asset is estimated to determine whether there has been a loss and, if so, its amount. Intangible assets not yet available for use are tested for impairment annually.

A revaluation decrease that does not result from a loss of economic value or service potential is recognised as an impairment charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure. Impairment losses that arise from a clear consumption of economic benefit should be taken to expenditure. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of the recoverable amount but capped at the amount that would have been determined had there been no initial impairment loss. The reversal of the impairment loss is credited to expenditure to the extent of the decrease previously charged there and thereafter to the revaluation reserve.

Impairments are analysed between Departmental Expenditure Limits (DEL) and Annually Managed Expenditure (AME) from 2011-12. This is necessary to comply with Treasury's budgeting guidance. DEL limits are set in the Spending Review and Departments may not exceed the limits that they have been set.
AME budgets are set by the Treasury and may be reviewed with departments in the run-up to the Budget. Departments need to monitor AME closely and inform Treasury if they expect AME spending to rise above forecast. Whilst Treasury accepts that in some areas of AME inherent volatility may mean departments do not have the ability to manage the spending within budgets in that financial year, any expected increases in AME require Treasury approval.

1.11 Donated assets

Following the accounting policy change outlined in the Treasury FREM for 2011-12, a donated asset reserve is no longer maintained. Donated non-current assets are capitalised at their fair value on receipt, with a matching credit to Income. They are valued, depreciated and impaired as described above for purchased assets. Gains and losses on revaluations, impairments and sales are as described above for purchased assets. Deferred income is recognised only where conditions attached to the donation preclude immediate recognition of the gain.

This accounting policy change has been applied retrospectively and consequently the 2010-11 results have been restated.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.12 Government grants

Following the accounting policy change outlined in the Treasury FREM for 2011-12, a government grant reserve is no longer maintained. The value of assets received by means of a government grant are credited directly to income. Deferred income is recognised only where conditions attached to the grant preclude immediate recognition of the gain.

This accounting policy change has been applied retrospectively but because the Trust did not have any government grants, 2010-11 results have not been restated.

1.13 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met when the sale is highly probable, the asset is available for immediate sale in its present condition and management is committed to the sale, which is expected to qualify for recognition as a completed sale within one year from the date of classification. Non-current assets held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell. Fair value is open market value including alternative uses.

The profit or loss arising on disposal of an asset is the difference between the sale proceeds and the carrying amount and is recognised in the Statement of Comprehensive Income. On disposal, the balance for the asset on the revaluation reserve is transferred to retained earnings. For donated and government-granted assets, a transfer is made to or from the relevant reserve to the profit/loss on disposal account so that no profit or loss is recognised in income or expenses. The remaining surplus or deficit in the donated asset or government grant reserve is then transferred to retained earnings.

Property, plant and equipment that is to be scrapped or demolished does not qualify for recognition as held for sale. Instead, it is retained as an operational asset and its economic life is adjusted. The asset is de-recognised when it is scrapped or demolished.

1.14 Leases

Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases.

The trust as lessee

Property, plant and equipment held under finance leases are initially recognised, at the inception of the lease, at fair value or, if lower, at the present value of the minimum lease payments, with a matching liability for the lease obligation to the lessor. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate on interest on the remaining balance of the liability. Finance charges are recognised in calculating the trust's surplus/deficit.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. Lease incentives are recognised initially as a liability and subsequently as a reduction of rentals on a straight-line basis over the lease term.

Contingent rentals are recognised as an expense in the period in which they are incurred.

Where a lease is for land and buildings, the land and building components are separated and individually assessed as to whether they are operating or finance leases.

The trust as lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the trust's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the trust's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.15 Inventories

Inventories are valued at the lower of cost and net realisable value using either the first-in first-out or weighted average cost formula. This is considered to be a reasonable approximation to fair value due to the high turnover of stocks.

1.16 Cash and cash equivalents

Cash is cash in hand and deposits with any financial institution repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in 3 months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Statement of Cash Flows, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and that form an integral part of the Trust's cash management.

1.17 Provisions

Provisions are recognised when the Trust has a present legal or constructive obligation as a result of a past event, it is probable that the Trust will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the expenditure required to settle the obligation at the end of the reporting period, taking into account the risks and uncertainties. Where a provision is measured using the cash flows estimated to settle the obligation, its carrying amount is the present value of those cash flows using HM Treasury's discount rate of 2.2% in real terms (2.8% for employee early departure obligations).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the amount of the receivable can be measured reliably.

Present obligations arising under onerous contracts are recognised and measured as a provision. An onerous contract is considered to exist where the Trust has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

A restructuring provision is recognised when the Trust has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arsing from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with ongoing activities of the entity.

1.18 Clinical negligence costs

The NHS Litigation Authority (NHSLA) operates a risk pooling scheme under which the trust pays an annual contribution to the NHSLA which in return settles all clinical negligence claims. The contribution is charged to expenditure. Although the NHSLA is administratively responsible for all clinical negligence cases the legal liability remains with the trust. The total value of clinical negligence provisions carried by the NHSLA on behalf of the trust is disclosed at note 35.

1.19 Non-clinical risk pooling

The Trust participates in the Property Expenses Scheme and the Liabilities to Third Parties Scheme. Both are risk pooling schemes under which the trust pays an annual contribution to the NHS Litigation Authority and, in return, receives assistance with the costs of claims arising. The annual membership contributions, and any excesses payable in respect of particular claims are charged to operating expenses as and when they become due.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.20 EU Emissions Trading Scheme

EU Emission Trading Scheme allowances are accounted for as government grant funded intangible assets if they are not expected to be realised within twelve months, and otherwise as other current assets. They are valued at open market value. As the NHS body makes emissions, a provision is recognised with an offsetting transfer from deferred income. The provision is settled on surrender of the allowances. The asset, provision and deferred income amounts are valued at fair value at the end of the reporting period.

1.21 Contingencies

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the trust, or a present obligation that is not recognised because it is not probable that a payment will be required to settle the obligation or the amount of the obligation cannot be measured sufficiently reliably. A contingent liability is disclosed unless the possibility of a payment is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the trust. A contingent asset is disclosed where an inflow of economic benefits is probable.

Where the time value of money is material, contingencies are disclosed at their present value.

1.22 Financial assets

Financial assets are recognised when the Trust becomes party to the financial instrument contract or, in the case of trade receivables, when the goods or services have been delivered. Financial assets are derecognised when the contractual rights have expired or the asset has been transferred.

Financial assets are initially recognised at fair value.

Financial assets are classified into the following categories: financial assets at fair value through profit and loss; held to maturity investments; available for sale financial assets, and loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets at fair value through profit and loss

Embedded derivatives that have different risks and characteristics to their host contracts, and contracts with embedded derivatives whose separate value cannot be ascertained, are treated as financial assets at fair value through profit and loss. They are held at fair value, with any resultant gain or loss recognised in calculating the trust's surplus or deficit for the year. The net gain or loss incorporates any interest earned on the financial asset.

Held to maturity investments

Held to maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity, and there is a positive intention and ability to hold to maturity. After initial recognition, they are held at amortised cost using the effective interest method, less any impairment. Interest is recognised using the effective interest method.

Available for sale financial assets

Available for sale financial assets are non-derivative financial assets that are designated as available for sale or that do not fall within any of the other three financial asset classifications. They are measured at fair value with changes in value taken to the revaluation reserve, with the exception of impairment losses. Accumulated gains or losses are recycled to surplus/deficit on de-recognition.

Notes to the Accounts - 1. Accounting Policies (Continued)

Loans and receivables
Loans and receivables are non-derivative financial assets with fixed or determinable payments which are not quoted in an active market. After initial recognition, they are measured at amortised cost using the effective interest method, less any impairment. Interest is recognised using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, to the initial fair value of the financial asset.

At the end of the reporting period, the trust assesses whether any financial assets, other than those held at 'fair value through profit and loss' are impaired. Financial assets are impaired and impairment losses recognised if there is objective evidence of impairment as a result of one or more events which occurred after the initial recognition of the asset and which has an impact on the estimated future cash flows of the asset.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through expenditure to the extent that the carrying amount of the receivable at the date of the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

1.23 Financial liabilities
Financial liabilities are recognised on the statement of financial position when the trust becomes party to the contractual provisions of the financial instrument or, in the case of trade payables, when the goods or services have been received. Financial liabilities are de-recognised when the liability has been discharged, that is, the liability has been paid or has expired.

Loans from the Department of Health are recognised at historical cost. Otherwise, financial liabilities are initially recognised at fair value.

Financial liabilities at fair value through profit and loss

Embedded derivatives that have different risks and characteristics to their host contracts, and contracts with embedded derivatives whose separate value cannot be ascertained, are treated as financial liabilities at fair value through profit and loss. They are held at fair value, with any resultant gain or loss recognised in the trust's surplus/deficit. The net gain or loss incorporates any interest payable on the financial liability.

Other financial liabilities

After initial recognition, all other financial liabilities are measured at amortised cost using the effective interest method, except for loans from Department of Health, which are carried at historic cost. The effective interest rate is the rate that exactly discounts estimated future cash payments through the life of the asset, to the net carrying amount of the financial liability. Interest is recognised using the effective interest method.

1.24 Value Added Tax
Most of the activities of the trust are outside the scope of VAT and, in general, output tax does not apply and input tax on purchases is not recoverable. Irrecoverable VAT is charged to the relevant expenditure category or included in the capitalised purchase cost of fixed assets. Where output tax is charged or input VAT is recoverable, the amounts are stated net of VAT.

1.25 Foreign currencies
The Trust's functional currency and presentational currency is sterling. Transactions denominated in a foreign currency are translated into sterling at the exchange rate ruling on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the spot exchange rate on 31 March. Resulting exchange gains and losses for either of these are recognised in the trust's surplus/deficit in the period in which they arise.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.26 Third party assets

Assets belonging to third parties (such as money held on behalf of patients) are not recognised in the accounts since the trust has no beneficial interest in them. Details of third party assets are given in Note 44 to the accounts.

1.27 Public Dividend Capital (PDC) and PDC dividend

Public dividend capital represents taxpayers' equity in the NHS trust. At any time the Secretary of State can issue new PDC to, and require repayments of PDC from, the trust. PDC is recorded at the value received. As PDC is issued under legislation rather than under contract, it is not treated as an equity financial instrument.

An annual charge, reflecting the cost of capital utilised by the trust, is payable to the Department of Health as public dividend capital dividend. The charge is calculated at the real rate set by HM Treasury (currently 3.5%) on the average carrying amount of all assets less liabilities, except for donated assets and cash balances with the Office of the Paymaster General. The average carrying amount of assets is calculated as a simple average of opening and closing relevant net assets.

1.28 Losses and Special Payments

Losses and special payments are items that Parliament would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally should not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way that individual cases are handled.

Losses and special payments are charged to the relevant functional headings in expenditure on an accruals basis, including losses which would have been made good through insurance cover had NHS trusts not been bearing their own risks (with insurance premiums then being included as normal revenue expenditure).

1.29 Subsidiaries

Material entities over which the Trust has the power to exercise control so as to obtain economic or other benefits are classified as subsidiaries and are consolidated. Their income and expenses; gains and losses; assets, liabilities and reserves; and cash flows are consolidated in full into the appropriate financial statement lines. Appropriate adjustments are made on consolidation where the subsidiary's accounting policies are not aligned with the Trust's or where the subsidiary's accounting date is before 1 January or after 30 June.

Subsidiaries that are classified as 'held for sale' are measured at the lower of their carrying amount or 'fair value less costs to sell'

For 2010-11 and 2011-12 in accordance with the directed accounting policy from the Secretary of State, the Trust does not consolidate the NHS charitable funds for which it is the corporate trustee.

1.30 Associates

Material entities over which the Trust has the power to exercise significant influence so as to obtain economic or other benefits are classified as associates and are recognised in the Trust's accounts using the equity method. The investment is recognised initially at cost and is adjusted subsequently to reflect the Trust's share of the entity's profit/loss and other gains/losses. It is also reduced when any distribution is received by the Trust from the entity.

Associates that are classified as 'held for sale' are measured at the lower of their carrying amount or 'fair value less costs to sell'.

1.31 Joint ventures

Material entities over which the Trust has joint control with one or more other parties so as to obtain economic or other benefits are classified as joint ventures.

Joint ventures that are classified as 'held for sale' are measured at the lower of their carrying amount or 'fair value less costs to sell'.

Notes to the Accounts - 1. Accounting Policies (Continued)

1.32 Joint operations

Joint operations are activities undertaken by the Trust in conjunction with one or more other parties but which are not performed through a separate entity. The Trust records its share of the income and expenditure; gains and losses; assets and liabilities; and cashflows.

1.33 Accounting Standards that have been issued but have not yet been adopted

The Treasury FReM does not require the following Standards and Interpretations to be applied in 2011-12. The application of the Standards as revised would not have a material impact on the accounts for 2011-12, were they applied in that year:

IAS 1 Presentation of financial statements (Other Comprehensive Income) - subject to consultation
IAS 12 - Income Taxes (amendment) - subject to consultation
IAS 19 Post-employment benefits (pensions) - subject to consultation
IAS 27 Separate Financial Statements - subject to consultation
IAS 28 Investments in Associates and Joint Ventures - subject to consultation
IFRS 7 - Financial Instruments: Disclosures (annual improvements) - effective 2012-13
IFRS 9 Financial Instruments - subject to consultation - subject to consultation
IFRS 10 Consolidated Financial Statements - subject to consultation
IFRS 11 Joint Arrangements - subject to consultation
IFRS 12 Disclosure of Interests in Other Entities - subject to consultation
IFRS 13 Fair Value Measurement - subject to consultation
IPSAS 32 - Service Concession Arrangement - subject to consultation

2. Pooled budgets

The trust does not have any pooled budgets.

3. Operating segments

The George Eliot Hospital NHS Trust operates within one healthcare segment, which represents 100% of the Trusts turnover.

4. Income generation activities

The trust undertakes income generation activities with an aim of achieving profit, which is then used in patient care. The trust does not have any income generating activities whose full cost exceeded £1m or were material to the overall income received in the year.

5. Revenue from patient care activities

	2011-12	2010-11
	£000	£000
Strategic health authorities	**0**	0
NHS trusts	**0**	0

Other	**49**	63
	107,306	99,329

1. In 2011-12 revenue from Primary Care Trusts included £2.3m transformational change support funding in addition to contracted payments under health care contracts. The trust also received £6.3m in 2011-12 for community services which were transferred to the trust in April 2011 as part of Transforming Community Services (TCS).

2. Injury cost recovery income is subject to a provision for impairment of receivables of 10.5% to reflect expected rates of collection in accordance with the NHS Manual of Accounts. All receivables prior to 1st April 2008 are provided in full.

6. Other operating revenue

	2011-12	2010-11

Total resource cost (£000s)	**7**	**0**	**7**	0	0	0

This note provides an analysis of Exit Packages agreed during the year. Redundancy and other departure costs have been paid in accordance with the provisions of the NHS Pension Scheme. Exit costs in this note are accounted for in full in the year of departure. Where the Trust has agreed early retirements, the additional costs are met by the Trust and not by the NHS pensions scheme. Ill-health retirement costs are met by the NHS pensions scheme and are not included in the table.

This disclosure reports the number and value of exit packages taken by staff leaving in the year. Note: The expense associated with these departures may have been recognised in part or in full in a previous period.

10.5 Pension costs

Past and present employees are covered by the provisions of the NHS Pensions Scheme. Details of the benefits payable under these provisions can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. The scheme is an unfunded, defined benefit scheme that covers NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme: the cost to the NHS Body of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period.

In order that the defined benefit obligations recognised in the financial statements do not differ materially from those that would be determined at the reporting date by a formal actuarial valuation, the FReM requires that "the period between formal valuations shall be four years, with approximate assessments in intervening years". An outline of these follows:

a) Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability in respect of the benefits due under the scheme (taking into account its recent demographic experience), and to recommend the contribution rates.

The last formal actuarial valuation undertaken for the NHS Pension Scheme was completed for the year ending 31 March 2004. Consequently, a formal actuarial valuation would have been due for the year ending 31 March 2008. However, formal actuarial valuations for unfunded public service schemes have been suspended by HM Treasury on value for money grounds while consideration is given to recent changes to public service pensions, and while future scheme terms are developed as part of the reforms to public service pension provision. Employer and employee contribution rates are currently being determined under the new scheme design.

b) Accounting valuation

A valuation of the scheme liability is carried out annually by the scheme actuary as at the end of the reporting period. Actuarial assessments are undertaken in intervening years between formal valuations using updated membership data are accepted as providing suitably robust figures for financial reporting purposes. However, as the interval since the last formal valuation now exceeds four years, the valuation of the scheme liability as at 31 March 2012, is based on detailed membership data as at 31 March 2010 updated to 31 March 2012 with summary global member and accounting data. In undertaking this actuarial assessment, the methodology prescribed in IAS 19, relevant FReM interpretations, and the discount rate prescribed by HM Treasury have also been used.

The latest assessment of the liabilities of the scheme is contained in the scheme actuary report, which forms part of the annual NHS Pension Scheme (England and Wales) Pension Accounts, published annually. These accounts can be viewed on the NHS Pensions website. Copies can also be obtained from The Stationery Office.

c) Scheme provisions

The NHS Pension Scheme provided defined benefits, which are summarised below. This list is an illustrative guide only, and is not intended to detail all the benefits provided by the Scheme or the specific conditions that must be met before these benefits can be obtained:

The Scheme is a "final salary" scheme. Annual pensions are normally based on 1/80th for the 1995 section and of the best of the last three years pensionable pay for each year of service, and 1/60th for the 2008 section of reckonable pay per year of membership. Members who are practitioners as defined by the Scheme Regulations have their annual pensions based upon total pensionable earnings over the relevant pensionable service.

With effect from 1 April 2008 members can choose to give up some of their annual pension for an additional tax free lump sum, up to a maximum amount permitted under HMRC rules. This new provision is known as "pension commutation".

Annual increases are applied to pension payments at rates defined by the Pensions (Increase) Act 1971, and are based on changes in retail prices in the twelve months ending 30 September in the previous calendar year. From 2011-12 the Consumer Price Index (CPI) will be used to replace the Retail Prices Index (RPI).

Early payment of a pension, with enhancement, is available to members of the scheme who are permanently incapable of fulfilling their duties effectively through illness or infirmity. A death gratuity of twice final year's pensionable pay for death in service, and five times their annual pension for death after retirement is payable

For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to the employer.

Members can purchase additional service in the NHS Scheme and contribute to money purchase AVC's run by the Scheme's approved providers or by other Free Standing Additional Voluntary Contributions (FSAVC) providers.

11 Better Payment Practice Code

11.1 Measure of compliance

	2011-12 Number	2011-12 £000	2010-11 Number	2010-11 £000

Percentage of NHS Trade Invoices Paid Within Target	87.82%	92.95%	85.40%	95.91%

The Better Payment Practice Code requires the Trust to aim to pay all valid invoices by the due date or within 30 days of receipt of a valid invoice, whichever is later. The Trust became a signatory to the Prompt Payment Code in 2010-11.

The Trust allowed a 2 day buffer period for payments in transit when calculating the amount of invoices paid on time.

15.3 (cont). Property, plant and equipment

Donated assets include a contibution of £25,000 by the League of Friends towards the extension of the hospital's tea bar, which is run by the League. There were also £ 14,000 of equipment purchased with funds from the Trust's own charitable funds. In addtion the Trust received a contrubution of £65,000 from Macmillan towards a new cancer infomation centre.

Land, Buildings and Dwellings were valued as Modern Equivalent Assets (MEA) on the 31st July 2009 by David Cooney MA MRICS, GVA Grimley Ltd, Independent Property Valuers, in accordance with the Royal Institute of Chartered Surveyors (RICS) Valuation Standards, IFRS and FReM guidelines. The Fair Values (FV) and Market Values (MV) outlined below are as defined by UKPS 1.1 of the RICS Valuation Standards (March 2009). Market Value valuations have been carried out in accordance with Practice Statement 3.2 of the RICS Valuation Standards. Depreciated Replacement Cost (DRC) recognised under IAS 16 as a basis of valuation for reporting purposes. DRC assessments were undertaken for those properties considered to be specialised properties. A Specialised Property is a property that is rarely if ever sold in the market, except by way of a sale of the business or entity of which it is part, due to uniqueness arising from its specialised nature and design, its configuration, size, location, or otherwise.

The valuation is subject to adequate service potential, which is defined as: “The capacity of an asset to continue goods and services in accordance with the entity’s objectives”. It is assumed that the current use/services would still have to be provided by the Trust in the locality of Nuneaton. In accordance with Practice Statement 6.7 of the RICS Valuation Standards (March 2009), the Market Values of the properties for alternative use (on cessation of the existing business) are likely to be materially lower than the Fair Value, Market Value with continued use and Depreciated Replacement figures reported.

The basis of the valuation for the property, which is all freehold, is as follows:-
-72 Heath End Road -Market Value (IAS16)
-Operational areas.-Fair Value. (DRC) (IAS16)
-Surplus and Non-operational Buildings.-Market Value (IFRS 5)
-Mobile Phone Masts, Retail Shop, Nursery, Private Healthcare Clinic.-Market Value (IAS40). This property and associated land value is reported in note 15 under the heading land and buildings

Since the MEA valuation in 2009-10 GVA Grimley Ltd has provided information to the Trust which has been applied to land and building values to ensure they are reported in the accounts at fair value. In 2011-112 there has been no change to the land value but for buildings valued at DRC, based on an increase in the Building Cost Index (BCI) of 1.80% have been valued upwards by £885,000; the increase is included in the revaluation reserve.

In 2011-12 there was £155,000 impairment in buildings which were no longer required; the write down in value was fully offset by balances held in the revaluation reserve resulting in a technical charge to expenditure.

16.3 Intangible non-current assets

Intangible assets include £1,070,000 in development costs in respect of the scheme to digitise medial records. Expenditure will be capitalised as a intangible asset when the records have been prepared and will be amortised over the life of the asset.

Computer software includes £163,000 in respect of the Picture Archiving System (PACS) used in Radiology to report digital x-rays. The asset which was purchased in 2006 is being written down in value over 5 years in accordance with the contract for the supply of the system. It also includes £140,000 for the purchase of various Microsoft licences.

The net book value of intangible assets is based on the historic cost amortised over the estimated life of the asset. The Trust has no assets with indefinite useful lives.

There are no intangible assets funded by government grants.

The Trust has no intangible assets which are not recognised as assets because they do not meet the recognition criteria in IAS 38.

17 Analysis of impairments and reversals recognised in 2011-12

There have been no significant impairments this year or last year.

18 Investment property

The Trust does not have any investment property (31 March 2011 £nil).

Included in NHS receivables are prepaid pension contributions:	**0**	0		

The great majority of trade is with Primary Care Trusts, as commissioners for NHS patient care services. As Primary Care Trusts are funded by Government to buy NHS patient care services, no credit scoring of them is considered necessary.

No collateral is held for these receivables.

The provision for impairment of receivable includes receivables with NHS organisations whereas previously a provison for credit notes had been offset against NHS receivables -revenue. The comparative information has been restated.

22.2 Receivables past their due date but not impaired

Amount Included in the Provisions of the NHS Litigation Authority in Respect of Clinical Negligence Liabilities:	
As at "31/03/12"	9,100
As at "31/03/11"	11,984

Legal Claims

Legal claims comprise employer's liability and injury allowance payments which the Trust may be required to pay in the future. It is assumed that all employment liability claims will be paid within one year and that injury allowances are payable over the life of the recipient. The amount over five years is repayable in quarterly instalments. The injury allowance is currently £30,923 per annum, discounted by 2.8%.

Clinical Negligence

The NHS Litigation Authority includes £9,100,095 in their accounts at 31 March 2012 in respect of clinical negligence liabilities of the trust. (31 March 2011: £11,983,764).

Other

Other provisions include claims made by current or previous employees of the trust based on their contracts of employment. It is assumed claims to be paid within one year. It also includes an amount of £160,000 for the future purchase of units required under the Carbon Reduction Scheme which relate to this years usage.

36 Contingencies

The Trust had no contingent assets or liabilities at the year end (2010-11 £nil).

Financial responsibility for clinical negligence cases passed to the NHS Litigation Authority on 1 April 2002. No contingencies or provisions are left in the accounts in relation to these cases, even though the legal liability for them remains with the Trust.

37 Financial Instruments

37.1 Financial risk management

Financial reporting standard IFRS 7 requires disclosure of the role that financial instruments have had during the period in creating or changing the risks a body faces in undertaking its activities. Because of the continuing service provider relationship that the NHS Trust has with primary care Trusts and the way those primary care Trusts are financed, the NHS Trust is not exposed to the degree of financial risk faced by business entities. Also financial instruments play a much more limited role in creating or changing risk than would be typical of listed companies, to which the financial reporting standards mainly apply. The NHS Trust has limited powers to borrow or invest surplus funds and financial assets and liabilities are generated by day-to-day operational activities rather than being held to change the risks facing the NHS Trust in undertaking its activities.

The Trust's treasury management operations are carried out by the finance department, within parameters defined formally within the Trust's standing financial instructions and policies agreed by the board of directors. Trust treasury activity is subject to review by the Trust's internal auditors.

Currency risk
The Trust is principally a domestic organisation with the great majority of transactions, assets and liabilities being in the UK and sterling based. The Trust has no overseas operations. The Trust therefore has low exposure to currency rate fluctuations.

Interest rate risk
The Trust borrows from government for capital expenditure, subject to affordability as confirmed by the strategic health authority. The borrowings are for 1 – 25 years, in line with the life of the associated assets, and interest is charged at the National Loans Fund rate, fixed for the life of the loan. The Trust therefore has low exposure to interest rate fluctuations.

Credit risk

Because the majority of the Trust's income comes from contracts with other public sector bodies, the Trust has low exposure to credit risk. The maximum exposures as at 31 March 2012 are in receivables from customers, as disclosed in the trade and other receivables note.

Liquidity risk
The Trust's operating costs are incurred under contracts with primary care Trusts, which are financed from resources voted annually by Parliament . The Trust funds its capital expenditure from funds obtained within its prudential borrowing limit. The Trust is not, therefore, exposed to significant liquidity risks.

38 Events after the end of the reporting period

The Trust has signed a tripartite formal agreement with the West Midlands Strategic Health Authority and the Department of Health that sets out a plan to identify a strategic partner that will lead to the Trust either becoming a Foundation Trust or establishing some other organisational model. The procurement of the strategic partner is planned to take place during 2012-13.

The Trust is working with commissioners on the future plans for inpatient paediatric services which may lead to a transfer of services during 2012-13.

39 Related party transactions

During the year none of the Department of Health Ministers, trust board members or members of the key management staff, or parties related to any of them, has undertaken any material transactions with George Eliot Hospital NHS Trust.

The Department of Health is regarded as a related party. During the year George Eliot Hospital NHS Trust has had a significant number of material transactions with the Department, and with other entities for which the Department is regarded as the parent Department.

	2011-12		2010-11	
	Revenue	**Expenditure**	Revenue	Expenditure
	£000	**£000**	£000	£000

West Midlands Ambulance Service NHS Trust	0	64	0	49
Coventry and Warwickshire Partnership NHS Trust	127	87	135	103
NHS Litigation Authority	0	2,721	0	2,521

In addition, the trust has had a number of material transactions with other government departments and other central and local government bodies. Most of these transactions have been with HM Revenue and Customs with regard to income tax, national insurance and VAT, The Department of Works and Pensions with regard to the injury allowance scheme and the NHS Pensions Agency with regard to both employee and employer pension contributions.

The Trust has also received revenue and capital payments from a number of charitable funds, certain of the trustees for which are also members of the Trust board.

40 Losses and special payments

The total number of losses cases and their total value was as follows:

	2011-12		2010-11	
	Total Value of Cases	**Total Number of Cases**	Total Value of Cases	Total Number of Cases
	£		£	
Losses	40,591	22	32,127	59
Special payments	80395	30	84728	31
Total losses and special payments	120,986	52	116,855	90

There were no clinical cases where the net payment exceeded £250,000.

There were no fraud cases where the net payment exceeded £250,000.

41. Financial performance targets

The figures given for periods prior to 2009-10 are on a UK GAAP basis as that is the basis on which the targets were set for those years.

41.1 Breakeven performance	**2005-06 £000**	**2006-07 £000**	**2007-08 £000**	**2008-09 £000**	**2009-10 £000**	**2010-11 £000**	**2011-12 £000**
Turnover	83,064	93,496	95,369	96,352	105,330	108,324	117,011
Retained surplus/(deficit) for the year	(7,294)	1,303	1,382	964	1,008	47	(194)
Adjustment for:							
Timing/non-cash impacting distortions:							
Use of pre - 1.4.97 surpluses [FDL(97)24 Agreements]	0	0	0	0	0	0	0
2006/07 PPA (relating to 1997/98 to 2005/06)	0	0	0	0	0	0	0
2007/08 PPA (relating to 1997/98 to 2006/07)	0	54	0	0	0	0	0
2008/09 PPA (relating to 1997/98 to 2007/08)	0	0	0	0	0	0	0
Adjustments for Impairments (Note 1 below).	0	0	0	(149)	156	65	155
Consolidated Budgetary Guidance - Adjustment for Dual Accounting under IFRIC12*	0	0	0	0	0	0	0
Adjustments for impact of policy change re donated assets (Note 2 below).	0	0	0	0	0	0	84
Other agreed adjustments	0	791	0	0	0	0	0
Break-even in-year position	(7,294)	2,148	1,382	815	1,164	112	45
Break-even cumulative position	(8,072)	(5,924)	(4,542)	(3,727)	(2,563)	(2,451)	(2,406)

* Due to the introduction of International Financial Reporting Standards (IFRS) accounting in 2009-10, NHS Trust's financial performance measurement needs to be aligned with the guidance issued by HM Treasury measuring Departmental expenditure. Therefore, the incremental revenue expenditure resulting from the application of IFRS to IFRIC 12 schemes (which would include PFI schemes), which has no cash impact and is not chargeable for overall budgeting purposes, is excluded when measuring Breakeven performance. Other adjustments are made in respect of accounting policy changes (impairments and the removal of the donated asset and government grant reserves) to maintain comparability year to year.

	2005-06 %	**2006-07 %**	**2007-08 %**	**2008-09 %**	**2009-10 %**	**2010-11 %**	**2011-12 %**
Materiality test (I.e. is it equal to or less than 0.5%):							
Break-even in-year position as a percentage of turnover	-8.78	2.30	1.45	0.85	1.11	0.10	0.04
Break-even cumulative position as a percentage of turnover	-9.72	-6.34	-4.76	-3.87	-2.43	-2.26	-2.06

The Trust has a statutory duty to break even on a cumulative basis. In 2005-06 the Trust incurred a £7.3m deficit and in April 2006 a Public Interest Report was issued under Section 8 of the Audit Commission Act 1998 in relation to the financial standing of the Trust. The Trust developed a 5 year Financial Recovery Plan (FRP) which was agreed with the Strategic Health Authority and the Department of Health to achieve cumulative break even by the end of 2011-12. At the time the Trust secured a Department of Health Working Capital loan to provide cash support in the short/medium term. In 2011-12 the Trust achieved break-even with the support of £2.3m in transformational support funding but at the end of 2011-12 still had a cumulative deficit of £2.406m. Because the FRP is for a period over 5 years and the Trust is in cumulative deficit External Auditors have been required to submit a letter under section 19 of The Audit Commission Act 1998 to the Secretary of State informing him that the Trust has not met its statutory duty to break-even over a 3 year period.

1. This represents the impairment of buildings permanently taken out of operational use .

2. This is required because donated assets received during 2011-12 were less than the deprecation on all donated

The amounts in the above tables in respect of financial years 2005/06 to 2008/09 inclusive have **not** been restated to IFRS and remain on a UK GAAP basis.

41.2 Capital cost absorption rate

Until 2008/09 the trust was required to absorb the cost of capital at a rate of 3.5% of forecast average relevant net assets. The rate is calculated as the percentage that dividends paid on public dividend capital bears to the actual average relevant net assets.

From 2009/10 the dividend payable on public dividend capital is based on the actual (rather than forecast) average relevant net assets and therefore the actual capital cost absorption rate is automatically 3.5%.

41.3 External financing

The trust is given an external financing limit which it is permitted to undershoot.

	£000	**2011-12 £000**	2010-11 £000
External financing limit		**2,359**	(1,090)
Cash flow financing	**(5,143)**		(3,882)
Finance leases taken out in the year	**0**		0
Other capital receipts	**(103)**		(171)
External financing requirement		**(5,246)**	(4,053)
Undershoot/(overshoot)		**7,605**	2,963

The Trust achieved its EFL with an undershoot of £7,605,000 (2010-11 £3,063,000).

The undershoot was because of the under-spend on capital payments of £3.6m and a movement in working capital balances of £4.0m.

41.4 Capital resource limit

The trust is given a capital resource limit which it is not permitted to exceed.

	2011-12 £000	2010-11 £000
Gross capital expenditure	**3,091**	2,790
Less: book value of assets disposed of	**0**	0
Less: capital grants	**0**	0
Less: donations towards the acquisition of non-current assets	**(103)**	(171)
Charge against the capital resource limit	**2,988**	2,619
Capital resource limit	**5,830**	4,737
(Over)/underspend against the capital resource limit	**2,842**	2,118

The Trust achieved its CRL with an undershoot of £2,842,000 (2010-11 £2,118,000).

The undershoot on capital was because the Trust made a decision to defer all non-essential capital expenditure into 2012-13 because of a risk of insufficient cash being available due to under-achievement of the Cost Improvement Programme. The Trust is developing both its' estate strategy and clinical information strategy which will utilise cash that has been carried forward as a result of the undershoot of the Capital Resource limit.

42 Third party assets

The Trust held cash and cash equivalents which relate to monies held by the NHS Trust on behalf of patients or other parties. This has been excluded from the cash and cash equivalents figure reported in the accounts.

	31 March 2012 £000s	**31 March 2011** £000s
Third party assets held by the Trust	0	3

43. Pathology Service

George Eliot Hospital NHS Trust, University Hospitals Coventry and Warwickshire NHS Trust and South Warwickshire General Hospitals NHS Trust formed a single pathology service at 1 April 2008. The service is hosted by University Hospitals Coventry and Warwickshire NHS Trust and there is an accountability agreement approved by the Trusts. The agreement will continue until terminated through agreement of the Stakeholder Board. The agreement includes risk and benefit sharing; the Trust share being 13.6%. Payments for the service are now made in accordance with a service level agreement.

The Pathology Service accounts reported by University Hospital Coventry and Warwickshire NHS Trust were:-

	Reported By University Hospitals Coventry & Warwickshire NHS Trust		George Eliot Hospital NHS Trust's Share	
	2011-12	2010-11	**2011-12**	2010-11
	£000	£000	**£000**	£000
Revenue from patient care activities	**913**	354	**124**	48
Other operating revenue	**27,447**	27,102	**3,733**	2,673
Operating expenses	**(28,601)**	(27,613)	**(3,890)**	(2,742)
Operating surplus/(deficit)	**(241)**	(157)	**(33)**	(21)

University Hospitals Coventry and Warwickshire NHS Trust reported a deficit of £241,000 in their accounts for the pathology service in 2011-12 (2010-11 - £104,000), the George Eliot Hospital NHS Trust's share was £33,000 (2010-11 £21,000).

	Reported By University Hospitals Coventry & Warwickshire NHS Trust		George Eliot Hospital NHS Trust's Share	
	2011-12	2010-11	**2011-12**	2010-11
